MELQART

ABOUT US

GLOBAL EXPERTISE IN RENEWABLE ENERGY

Melqart Energy Solutions is the energy engineering practice of Melqart Inc., a **U.S.** engineering and consulting firm founded in 2015 and based in California. Our engineers have delivered engineering services on 30+ utility-scale solar projects totaling 2+ GW across 10 countries. Our focus: utility-scale PV — from concept through energization.

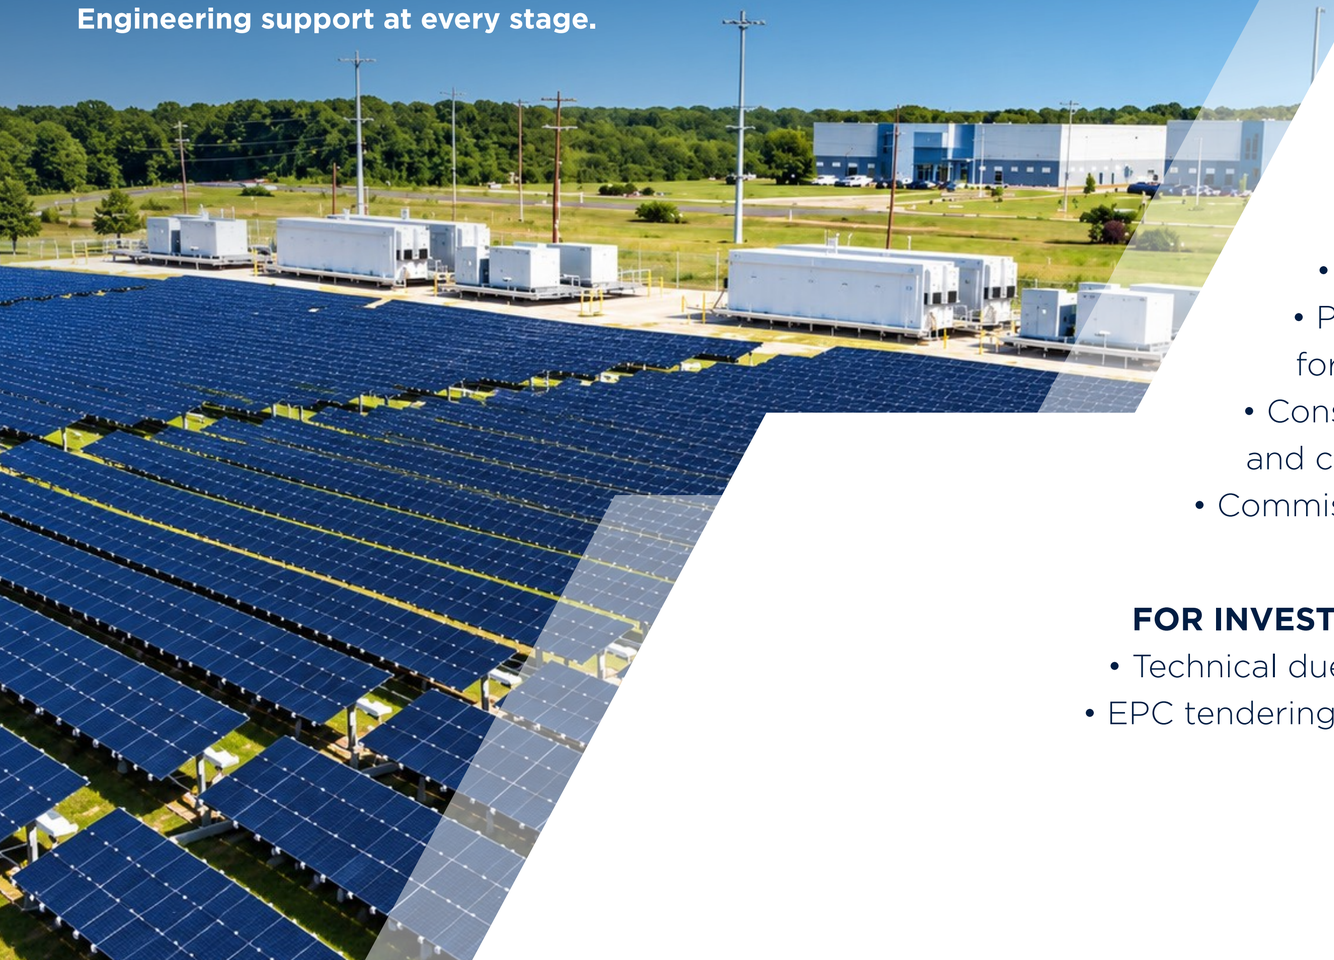

MELQART

WHAT WE DO

FROM CONCEPT TO ENERGY FLOW

Engineering support at every stage.

FOR DEVELOPERS & PROJECT OWNERS

- Site studies - consulting & execution
- Feasibility studies & early-stage development support
- Permitting & grant management support
- 3rd-party technical peer review - Owner's or Independent Engineer

FOR EPC CONTRACTORS

- Full Engineering of Record: from 30% through IFC and as-built design sets
- Procurement specifications, validation & early procurement support for long-lead critical equipment
- Construction technical support & project management for schedule and construction control
- Commissioning support

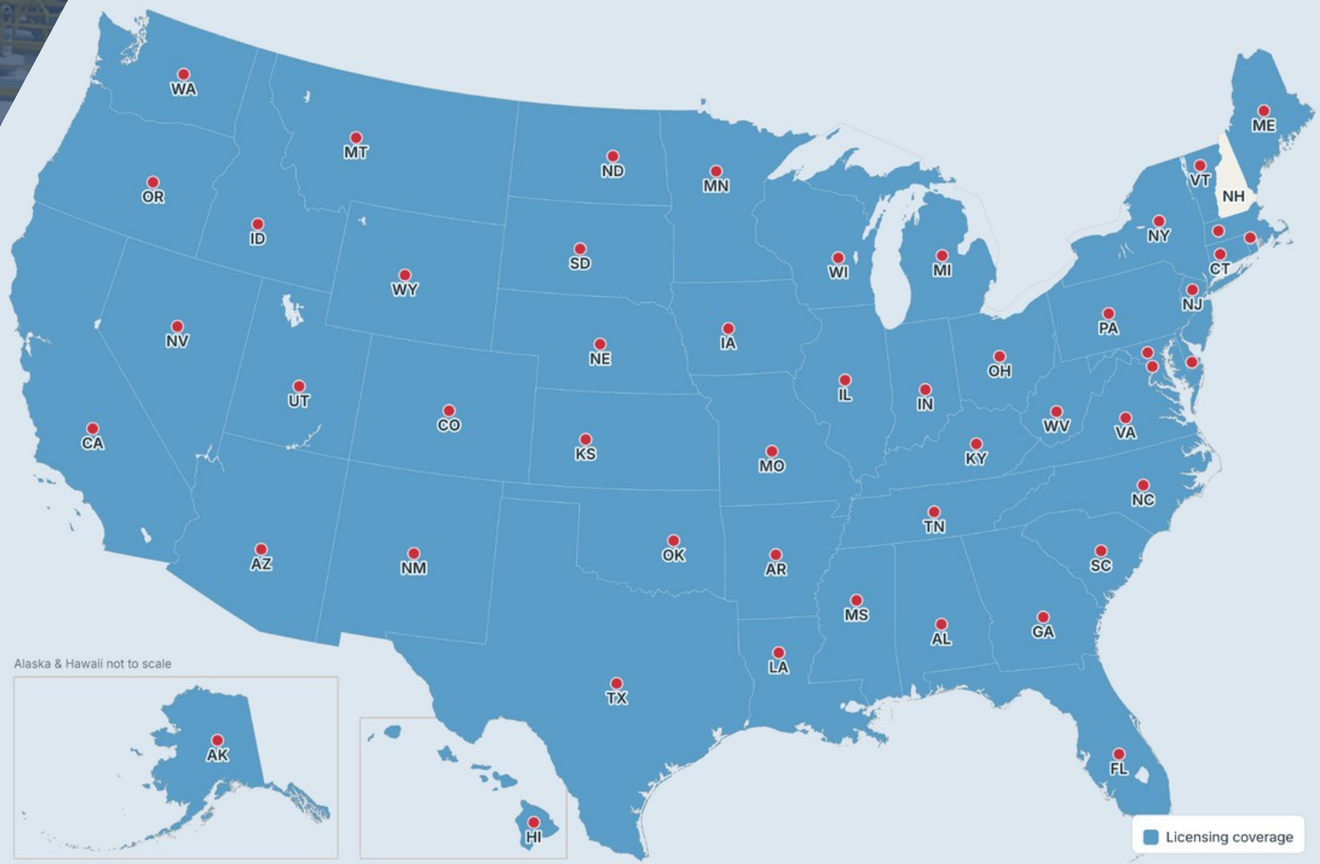

FOR INVESTORS & LENDERS

- Technical due diligence & feasibility reports
- EPC tendering management

MELQART

LICENSED ACROSS THE US

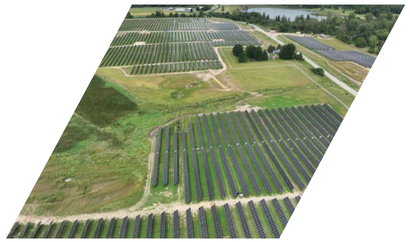

Engineering support at every stage.

Our engineers have delivered engineering services on utility-scale solar and grid projects across several countries on 4 continents.

MELQART

REPRESENTATIVE U.S. PROJECTS

MURCH SOLAR — 103 MW | MICHIGAN — IN PROGRESS Utility-scale PV farm with HV step-up substation Role: Engineering + EoR for the EPC — 60% through IFC and as-built sets, with procurement and construction support.

JASPER — 82 MW | INDIANA — COMMISSIONED Utility-scale PV farm Role: Engineering + EoR for the EPC — 30% through IFC and as-built sets, with procurement and construction support.

PEACE CREEK SOLAR — 56 MW | FLORIDA — COMPLETED Utility-scale PV on Florida's challenging soils. Role: Civil and structural EPC engineering — complex foundation systems for stability and resilience.

MELQART

LET'S ENGINEER YOUR NEXT SOLAR PROJECT

Whether you're evaluating a site, preparing a tender, or building at full speed - let's take the next step together.
